

Let us see in detail how to launch an on-demand EC2 instance in AWS Cloud .Login and access to AWS services

Step1) In this step,

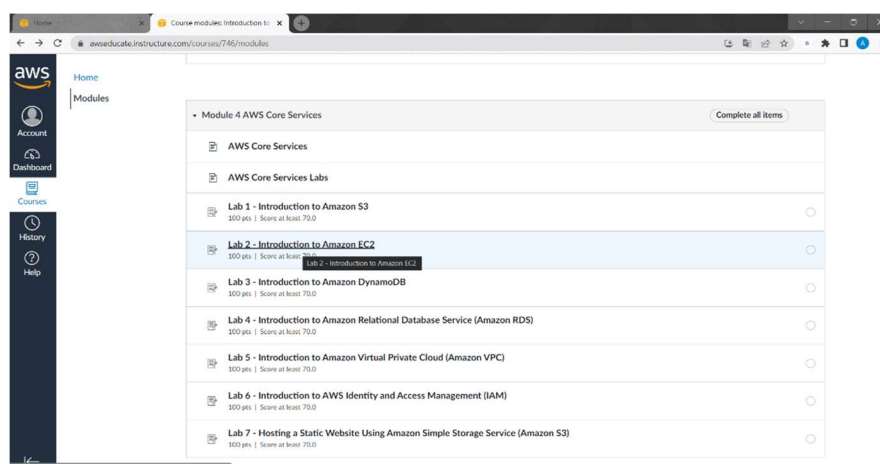

- Log into your AWS account.

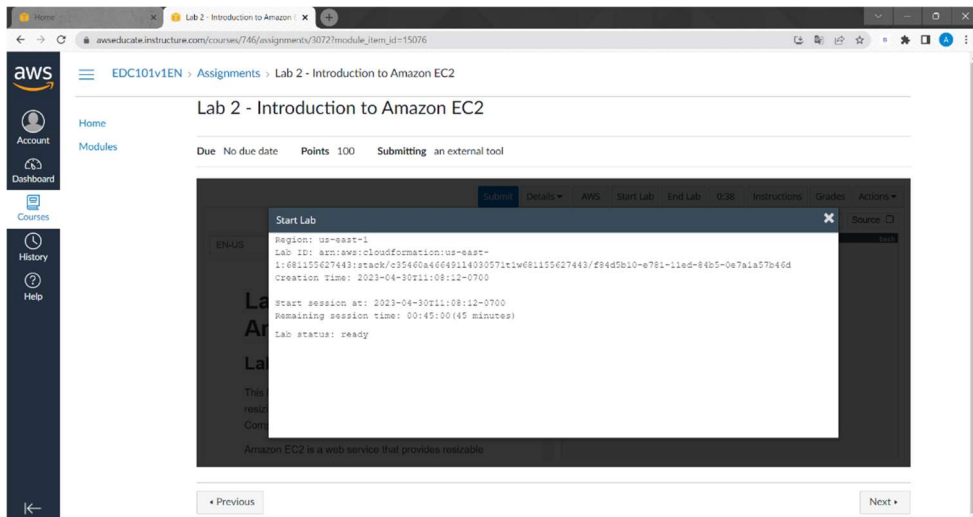

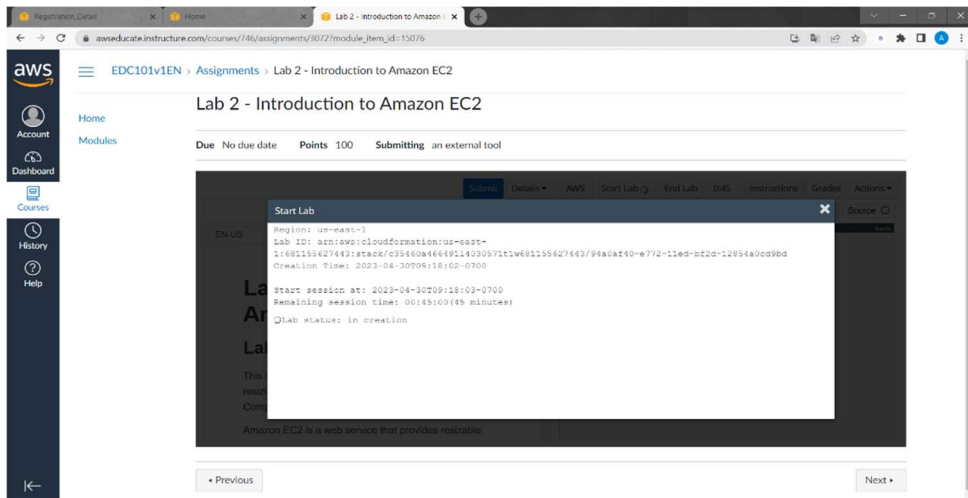

Step2) In this step, Start the Introduction to Cloud -> Select modules at the bottom

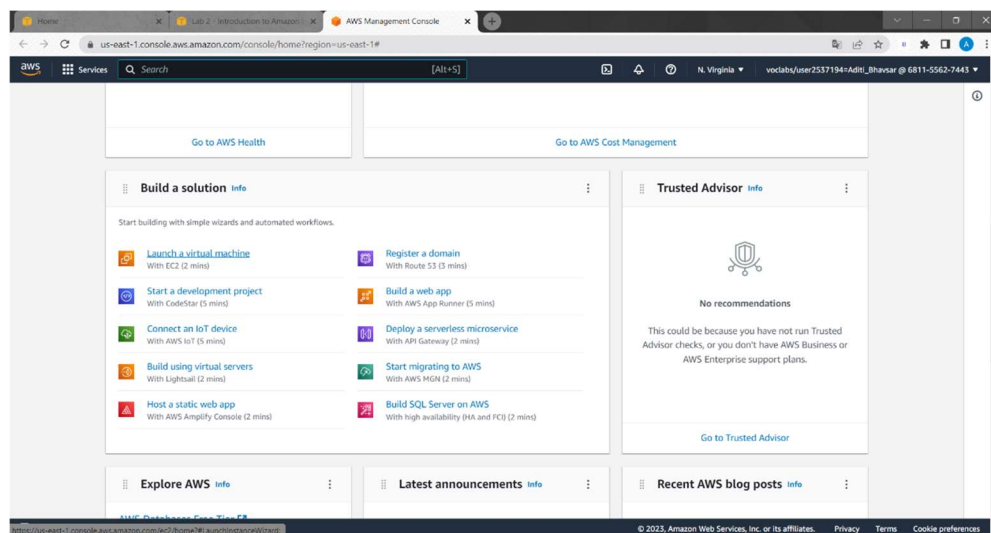

Step3) In this step, Select Lab 2 Introduction to Amazon EC2.

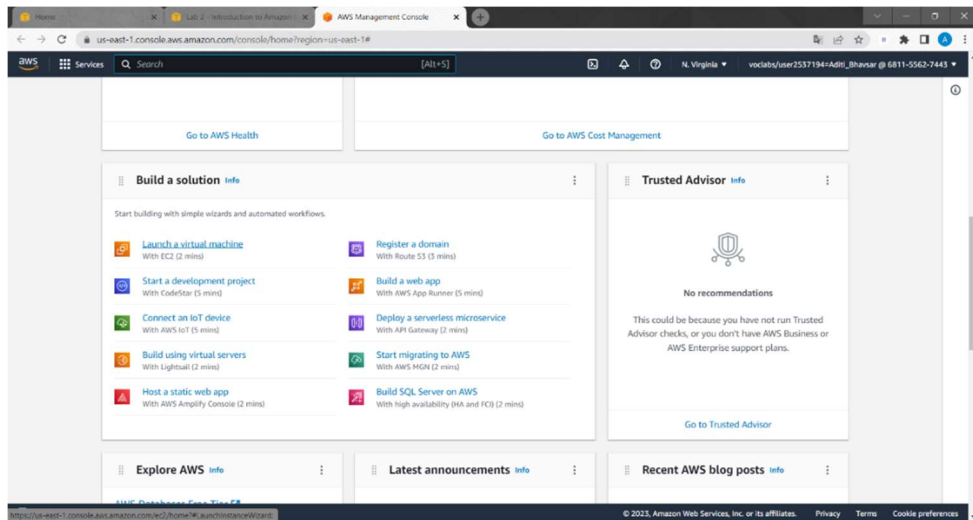

Step 4) Then Start the Lab, It will take sometime wait till then.

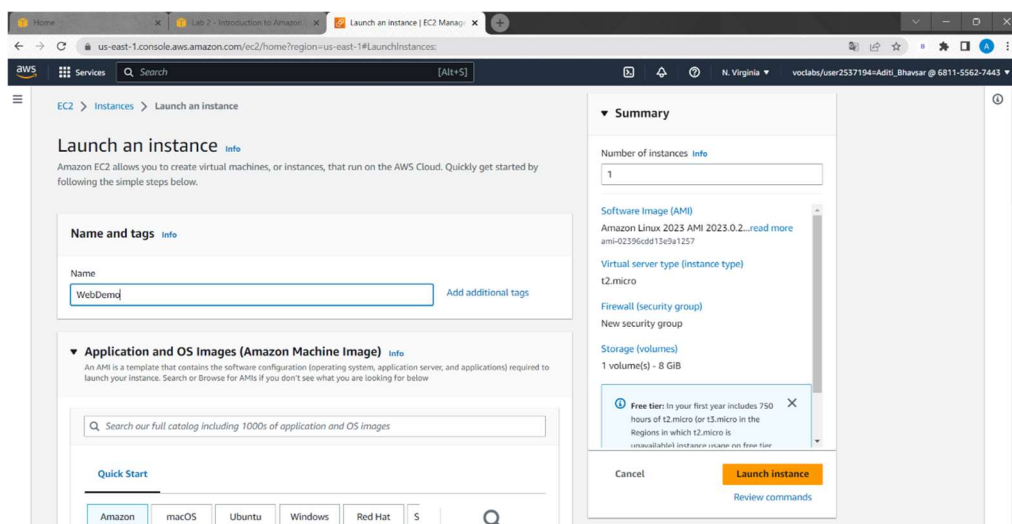

Step 5) Once the Lab is Ready select AWS, it will redirect you to AWS Management Console

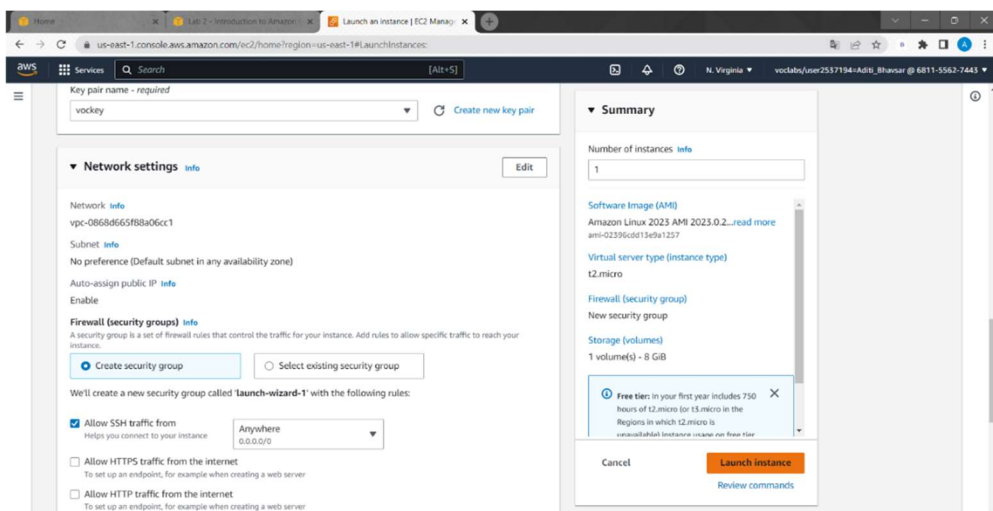

Step 6) Once the Lab is Ready select AWS, it will redirect you to AWS Management Console In that Select Launch a virtual machine with EC2.

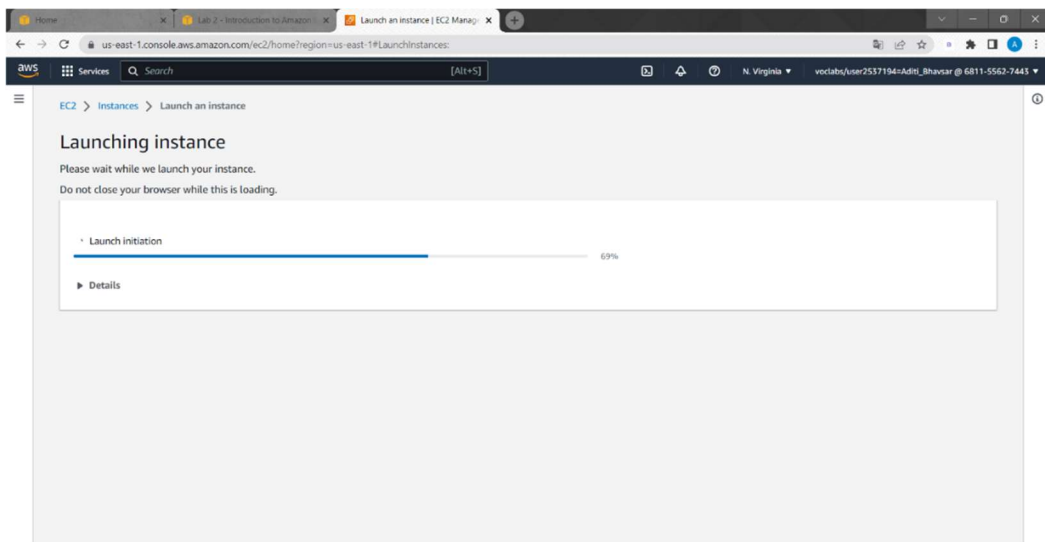

- Give it a name (Eg. WebDemo)

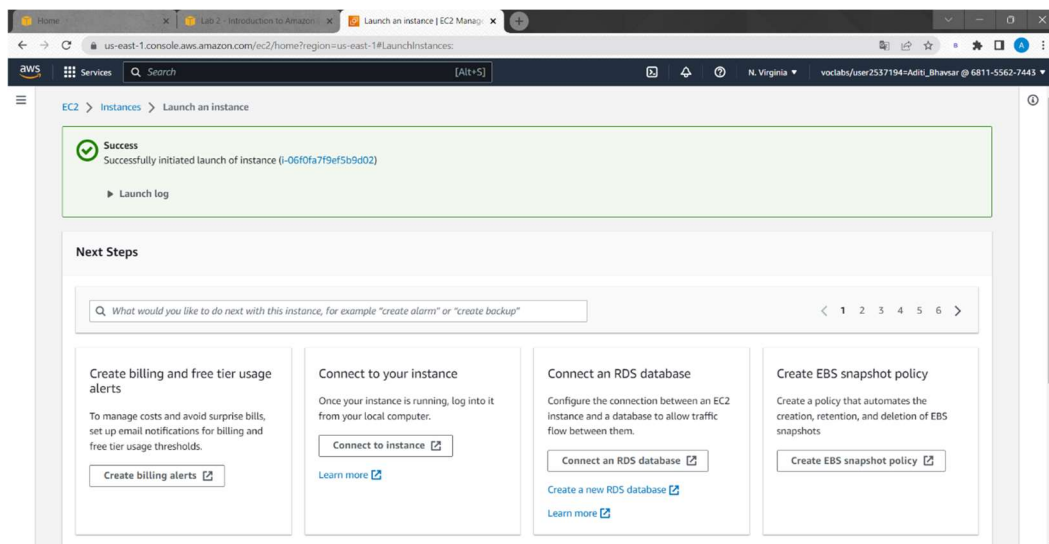

- Launch it by clicking Launch Instance at bottom.

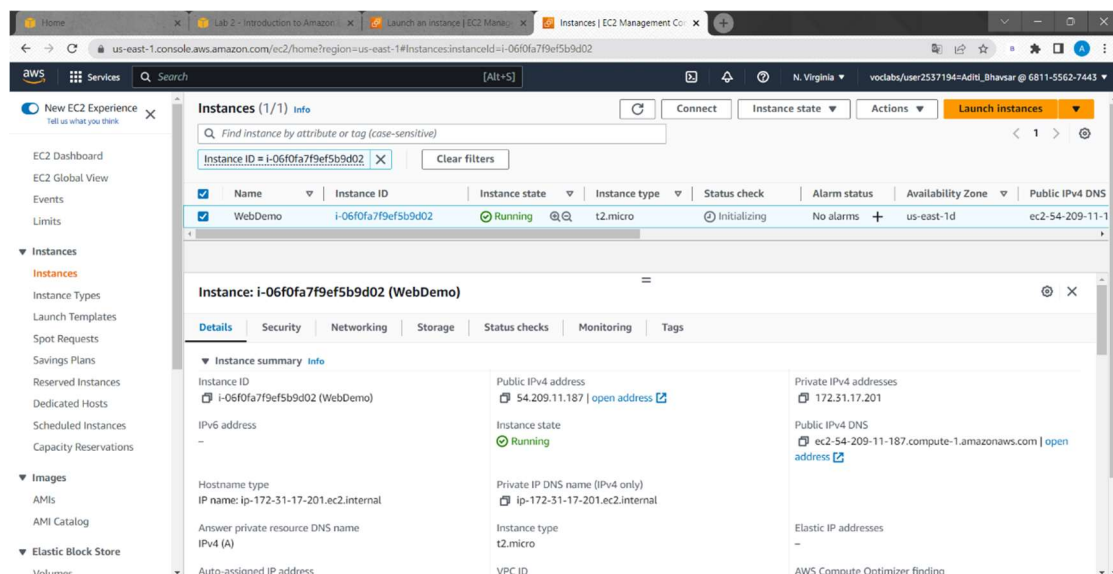

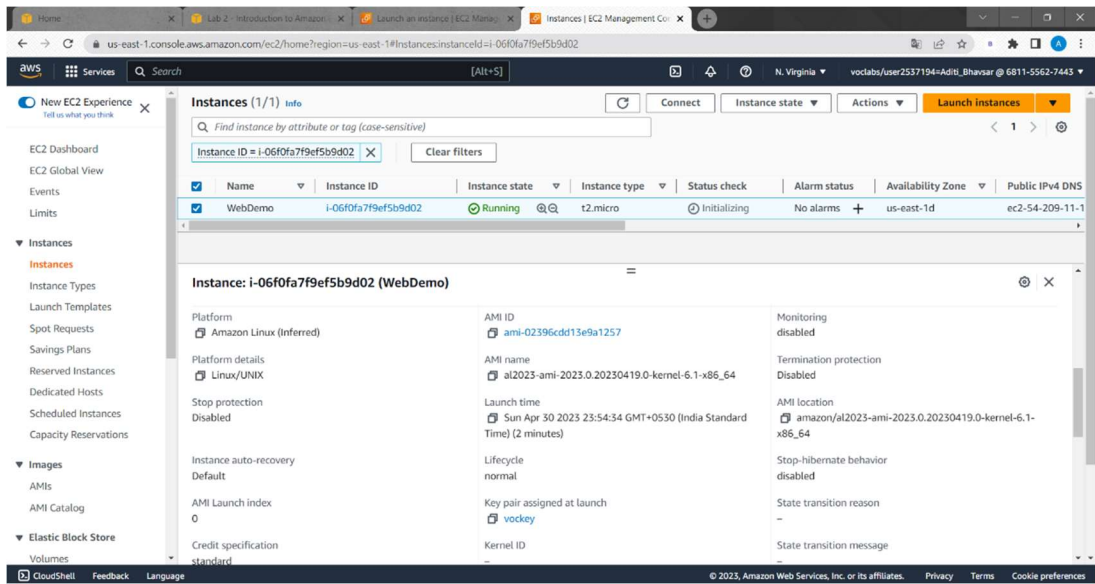

After Successfully Launching,

Information about your Instance will be Displayed.

End the Lab when you have done with it.
